EXCURSIONS

Excursion in Palanga Amber Museum

The Palanga Amber Museum, near the Baltic Sea in Palanga, Lithuania, is a branch of the Lithuanian Art Museum. It is housed in the restored 19th-century Tiškevičiai Palace and is surrounded by the Palanga Botanical Garden. The museum's collection of amber comprises about 28,000 pieces, of which about 15,000 contain inclusions of insects, spiders, or plants. About 4,500 pieces of amber are exhibited; many of these are items of artwork and jewelry.

Excursion in Cold War Museum

Cold War Museum is located in the former Soviet Union's complex of ballistic missile silo launch. Since 1963 up to 1978, there had been deployed four medium- range ballistic missiles SS-4, armed with 2-megaton power thermonuclear warheads. These missiles, together with the nearby terrestrial platforms of analogue missile launching, had created a common Soviet nuclear armament group in Lithuania, which was able to destroy all the Europe.
