EXCURSIONS

Excursion in Ventės Ragas Ornithological Station
Ventės Ragas is an ideal place for watching and catching birds bot
in geographical and natural respect. One of the biggest bird migration
ways extends over the eastern shore of the Baltic Sea. Sometimes,
during September and October, more than 3 million of birds fly over
Klaipėda per day, 70-80 per cent of which turn to the Curonian
Lagoon, and approximately 30 per cent choose their way to the
Eastern shore of the Curonian Lagoon towards Ventės Ragas. In
1959, the first stationary catchers 12 m in height and 40 m in width
were established. In 1978, the great bird catcher was set up in Ventės
Ragas. Both these catchers are the largest in the world. Over the last
26 years, 1.6 million birds were ringed in Ventės Ragas. Currently,
50,000 to 80,000 birds are ringed in Ventės Ragas annually.

Excursion in Baltic Mythology Park

for building Educational paths is to showcase original Baltic
architecture of the universe and the world through images (sculpture)
